EDUCATION

Teerthankar Mahaveer University <i>Bachelor of Computer Applications</i> SGPA: 8.52	Moradabad, Uttar Pradesh <i>Expected Graduation, June 2025</i>
S.S. Children Academy <i>Intermediate</i>	Moradabad, Uttar Pradesh <i>2021-2022</i>
S.S. Children Academy <i>High School</i>	Moradabad, Uttar Pradesh <i>2019-2020</i>

PROFILE SUMMARY

Highly motivated and adaptable fresher. Possessing a keen eye for innovation and a collaborative spirit, I am eager to contribute to challenging projects. With strong communication skill .Proven ability to quickly learn new technologies and processes. Seeking a dynamic role at Accenture to leverage my skills and contribute to the company's growth.

- Committed to **staying updated** with the **latest industry** trends and technologies, continuously enhancing skills to provide innovative solutions

PROJECTS

Mailing Webapp

A full-featured mailing application enabling users to register, authenticate, and manage their email communications seamlessly.

- Developed the front-end using HTML & CSS, creating a responsive and user-friendly interface.
- Managed the backend entirely with Java, efficiently handling server-side logic and data processing.
- Worked with servlets, I/O, and mail packages to implement core mailing functionalities, ensuring smooth communication flow.

Online Shopping Webapp

A sleek and intuitive web application that allows users to seamlessly shop online, featuring user authentication, secure data management, and the ability to add selected items to a cart for an efficient checkout.

- Utilized HTML & CSS for the front-end, ensuring a responsive design that functions seamlessly across desktop devices.
- Implemented a user authentication process to verify login credentials, ensuring secure access to the web application.
- Managed the backend entirely with Java and efficiently handled data storage and retrieval with Oracle 10g.
- Worked with servlets for server-side processing and integrated with the database for data management.

M-Chat

A machine-dependent chat application developed using Java.

- Utilized the net, AWT Swing, and I/O packages for user interface and functionality.
- Implemented the TCP protocol for reliable message transmission.

Java Compiler

Developed a web-based Java compiler and runtime environment that allows users to write, compile, and execute Java code directly from their browsers.

- Utilized HTML/CSS and JavaScript for a user-friendly frontend that supports code editing, compilation, and execution.
- Implemented secure backend processing using Java Servlets, handling file management and process execution.
- Integrated javac and java commands for efficient compilation and execution of user-submitted Java code.
- Ensured secure and efficient server-side operations with detailed error handling and output retrieval.

SKILLS

Programming: Java, Python, HTML/CSS, SQL, C++, C, Data Structures and Algorithms

Tools: Maven, Eclipse, Git, Visual Studio

Personal: Strong Communication, Innovative, Collaborative, Curious, Fast learner, Technophile
